The Spectacle Lens in common use, termed druhe convex, have but one focus, and that heing in he centre. Now as the eyes, rolling from side to side, depar, from this point, it is affected by the distortions incident; and occasions in weak eyes, fatigue and pain, and in strong eyes a more frequent change of glass for those of higher power than is caused by the simple fattening of the eye by agr, or, to use the laceuage or many, the eye grow other. Cound the glass be attached to the e. or as to more with it, or the head be made to turn and accommodate the sight, while the eyes remain fixed, the double convex iens would not be so objectionable. But as meither of those plans could be very well accomplished, an easier method to reneedy this important detect in all hitherto constructed haips to the described in these glasses which, having not only central focus, but, for all practical purposes, one throughout, the objection above named, is entirely obvisted, as they will enable the wenter to perceive objects at every angle of vision, with all the correctness of the natural healthy sight. All glasses sold by him will be scientifically adjusted by means of an Oplimetro of his own invention.

Prof. Blook's thorough knowinge of the Anatomy of the various Pathological changes of the Anatomy of the various Pathological changes of the human eye enables him not only to staget glasses best fitted to the different variations of sight, reat also by merely examining the eye, to select such as are most suitable. offered the following resolutions: Resolved, That the true Teacher, wherever found, will hail with joy any means adapted to enhance his efficiency and power, that he will make any reasonable sacrifice to avail himself of them.

That the Teacher's meeting is prominently adapted to his wants in this respect, That Boards of Education, should furnish to all teachers, under their control, the fa-cilities necessary to organize and vigorously

That a strict account should be kept with each teacher; all absence, tardiness, and all failures, and imperfection in duty, connected with the Teacher's Meeting, being recorded, and submitted to the Board of Education, and that these should have their full weight in enabling said Board to estimate the true value of each teacher's services,

That at least one-half of each Teacher's Meeting should be appropriated to a thorough recitation, in one or more studies.

here, there being now no 4th of July attractions this side of Wapakonetta.

Arriving at Sidney, we found the Patriots of that place ready to take passage for Wapakon etta. Nothing of particular note turned up except the occing out of an overcharge of patriot issue from some of our Sidney addition, which was wasted in pulling down some of the flags which had been displayed by the Mail Agest on either of the out sides of his office and tear ing them into strings. We came to the conclusion of the ing them into strings. We came to the conclusion of the citizens of Sidney generally, and the reputation of her citizens for hose will be held accountable for that style of patricitism, we should probably behold in the north corner of the spirit world, a ministure north corner of the spirit world, a ministure city, labelled, Sidney, as she was on the 4th day of July, 1859, in another hemisphere, with Mann.
